

TRAN HAU (김진호)

SOFTWARE ENGINEER & BRSE

Seoul, South Korea (Soongsil University)
Email: onlydev.321@gmail.com
Portfolio: onlydev321.github.io
GitHub: github.com/OnlyDev321

ABOUT ME

I am a Software Engineering student at **Soongsil University** in Seoul with a strong foundation in Sofeware Engineer. Experienced in building practical web applications using **React**, **Spring Boot**, and **Node.js**. Native in **Vietnamese** and fluent in **Korean (TOPIK Level 5)**, **English (Working proficiency)**, Eager to learn and use my software skills in real projects as a Sofeware Engineer or BrSE.

EDUCATION

- **Soongsil University — Software Engineering** — **Seoul, South Korea**
  BSc Program · **GPA: 3.8 / 4.5** — Mar 2023 – Mar 2027(Expected)
- **Seoul National University — Korean Language Program** — **Seoul, South Korea**
  2-Year Full-Time Korean Language Training · **Level VI + TOPIK Level 5** — Mar 2021 – Feb 2023

HONORS & AWARDS

- Capstone Design Exhibition & Competition — **Silver Award** — Reward ↗
  Soongsil University
- Creative Engineering Design Competition — **Encouragement Award** — Reward ↗
  Soongsil University
- Korean Language Training Certificate — **Level VI** — Reward ↗
  Seoul National University Institute

FEATURED PROJECTS

- **CampusMatch** **Full-stack** — University Study & Team Matching Platform — 09/2026 – 12/2026
  `Next.js · React · TypeScript · Tailwind CSS · Spring Boot · PostgreSQL`
  - Web platform connecting students to find study partners and form course project teams.
  - Added major/year filters, role recruitment slots (Frontend/Backend/Design), and application tracking.

  Link: GitHub Repo
- **Wumpus World** **AI Engineer** — Knowledge-Based AI Agent Simulation — 09/2026 – 12/2026
  `Python · Pygame · BFS`
  - Built an autonomous AI bot in Python that applies logic rules to navigate hazards, dodge traps, and find gold.
  - Created an interactive 2D Pygame game with BFS pathfinding to visualize the agent's safe moves step-by-step.

  Link: GitHub Repo
- **MMDL** **AI / Machine Learning Engineer** — Multimodal LLM Reasoning Benchmark Research — 09/2026 – 12/2026
  `Python · PyTorch · Qwen-VL · Deep Learning`
  - Fine-tuned open-source Vision-Language models (Qwen-VL) to improve AI reasoning on multimodal tasks.
  - Built automated evaluation pipelines to benchmark model accuracy and inspect failure patterns.

  Link: GitHub Repo
- **Deepterview v2** **Frontend** — AI Video Interview & Behavioral Analysis — 03/2026 – 08/2026
  `React · TypeScript · Tailwind CSS · Spring Boot · Computer Vision`
  - Built an AI mock-interview tool that records webcam video and analyzes facial expressions and eye contact.
  - Designed an interactive feedback dashboard with a visual timeline to summarize response performance.

  Link: GitHub Repo
- **MOJI Chat** **Full-stack Developer** — Real-Time Collaborative Messaging App — 08/2025 – 11/2025
  `React · TypeScript · Express.js · WebSocket · Tailwind CSS`
  - Real-time chat web app featuring instant messaging, live typing indicators, and user presence status.
  - Implemented WebSocket auto-reconnect logic to ensure smooth, uninterrupted messaging on mobile and desktop.

  Links: Live Demo | GitHub Repo
- **todoX** **Full-stack Developer** — Minimalist Task & Productivity Web App — 05/2025 – 07/2025
  `React · Node.js · MongoDB · Tailwind CSS · shadcn/ui`
  - Lightweight task tracker with custom color themes, instant tag search, and quick status filtering.
  - Stored data locally with LocalStorage for fast, zero-login offline use and clean user interface.
