

TRAN HAU (김진호)

SOFTWARE ENGINEER & BRSE

Seoul, South Korea (Soongsil University)
Email: onlydev.321@gmail.com
Portfolio: onlydev321.github.io
GitHub: github.com/OnlyDev321

ABOUT ME

I am a Software Engineering student at **Soongsil University** in Seoul with a strong foundation in Sofeware Engineer. Experienced in building practical web applications using **React**, **Spring Boot**, and **Node.js**. Native in **Vietnamese** and fluent in **Korean (TOPIK Level 5)**, **English (Working proficiency)**, Eager to learn and use my software skills in real projects as a Sofeware Engineer or BrSE.

EDUCATION

- **Soongsil University — Software Engineering** — **Seoul, South Korea**
  BSc Program · **GPA: 3.8 / 4.5** — Mar 2023 – Mar 2027(Expected)
- **Seoul National University — Korean Language Program** — **Seoul, South Korea**
  2-Year Full-Time Korean Language Training · **Level VI + TOPIK Level 5** — Mar 2021 – Feb 2023

HONORS & AWARDS

- Capstone Design Exhibition & Competition — **Silver Award** — Reward ↗
  Soongsil University
- Creative Engineering Design Competition — **Encouragement Award** — Reward ↗
  Soongsil University
- Korean Language Training Certificate — **Level VI** — Reward ↗
  Seoul National University Institute

FEATURED PROJECTS

- **CampusMatch** — University Study & Team Matching Platform — 2026
  `Next.js · React · TypeScript · Tailwind CSS · Spring Boot · PostgreSQL`
  - Web platform connecting students for course study and project teams with student SSO verification.
  - Implemented academic filters (major, year), role quotas (FE/BE/Design), and real-time application dashboard.

  Link: GitHub Repo
- **Wumpus World** — Knowledge-Based AI Agent Simulation — 2026
  `Python · Pygame · BFS`
  - Built an autonomous agent that collects percepts (stench, breeze, glitter) to navigate hazards using propositional logic.
  - Implemented safe BFS pathfinding and rendered an interactive 2D Pygame game interface with a real-time reasoning HUD.

  Link: GitHub Repo
- **MMDL** — Multimodal LLM Reasoning Benchmark Research — 2026
  `Python · PyTorch · Qwen-VL · Deep Learning`
  - Fine-tuned Qwen-VL vision-language models on college-level reasoning benchmarks (MMMU & MMMU-Pro).
  - Automated evaluation pipeline for model generation, strict rule-based scoring, and error pattern analysis.

  Link: GitHub Repo
- **Deepterview v2** — AI Video Interview & Behavioral Analysis — 2026
  `React · TypeScript · Tailwind CSS · Spring Boot · Computer Vision`
  - Web application analyzing candidate webcam video to track facial expressions, focus levels, and emotional cues.
  - Built webcam recording interface and interactive visual timeline feedback reports to summarize candidate responses.

  Link: GitHub Repo
- **MOJI Chat** — Real-Time Collaborative Messaging App — 2025
  `React · TypeScript · Express.js · WebSocket · Tailwind CSS`
  - Real-time chat web app supporting live messaging, user presence status, and typing indicators via WebSockets.
  - Engineered auto-reconnect logic upon network interruptions with an ergonomic, responsive interface.

  Links: Live Demo | GitHub Repo
- **todoX** — Minimalist Task & Productivity Web App — 2025
  `React · Node.js · MongoDB · Tailwind CSS · shadcn/ui`
  - Lightweight task tracker with custom theme palettes, real-time tag search, and completion status filtering.
  - Stores data directly in browser LocalStorage for instant, zero-login offline usage and fast responsiveness.

TECHNICAL SKILLS & LANGUAGES

Languages:	JavaScript, TypeScript, Java, C
Web & Backend:	React, Node.js, Spring Boot, Tailwind CSS
Databases & Tools:	SQL, Git, Docker, Figma
Languages:	**Vietnamese** (Native), **Korean** (Fluent, TOPIK Level 5), **English** (Working proficiency)
